

Saving Tarrytown Pharmacy time & money with our temperature monitoring kit

Customer: Tarrytown Pharmacy

Problem: Proper storage of pharmaceuticals, biological samples, and other assets in the medical or life sciences field is oftentimes critical. For pharmacies, like Tarrytown Pharmacy, precise temperature monitoring of refrigerators, freezers, and warmers is vital to ensure patient safety and in reducing the loss of costly inventory; as well as to remain compliant with medical industry standards . Tarrytown Pharmacy is equipped with four types of refrigerated storage boxes including: simple dorm-style high capacity holding fridges, medical-grade fridges, a single deep-freeze storage unit, and a vaccine fridge that holds about \$40,000 of pharmaceuticals at any given time. The loss of monitoring the specified temperatures for these refrigerated storage boxes can result in the financial loss of inventory, the use of pharmaceuticals that have potentially been exposed to out-of-range temperatures which could harm patients and result in legal action that would be costly and damaging to a pharmacy.

Solution: Considering the value of medications in pharmacy refrigerators, the use of a temperature monitoring system can serve as insurance against costly inventory loss due to equipment failure, as well as keeping in conjunction with regulatory compliance due to inconsistent data logging. This is where the Cellular Machines Temperature Monitoring System comes in. For Tarrytown Pharmacy we were able to provide monitored tracking of their inventory, enabling them to respond quickly in the event of a failure (preventing loss of costly inventory) and recording conditions to a secure cloud server that generates reports necessary for regulatory compliance. The Cellular Machines Temperature Monitoring System has saved time and money for Tarrytown Pharmacy.

“Pharmaceuticals are temperature-sensitive. We like the Cellular Machines monitors for three reasons: they communicate over the cell network, non-technical people can operate them, and the cloud server history is a wonderful reporting and compliance tool providing an automatic record of what’s been going on – especially on the weekends.”

– Mark Newberry, Owner,
Tarrytown Pharmacy
